

From intelligent forensic technologies to secure online meetings and video conferencing:

PAN AMP AG develops and sells groundbreaking solutions for the secure use and management of content in data networks, forensic technologies with artificial intelligence and forensic cloud services in a secure enterprise-class network. As a German technology manufacturer, PAN AMP offers technologies and services, checks cloud services and complex networks for their security and enables clients to participate in funding programs. In addition to its own technology developments, PAN AMP is known for IT security contract projects, forensic contract services and for lectures in which attribution and forensic expertise come together.

EXPERTISE

- BSFZ seal for research and development activities (R&D)
- Authorized consulting company go-digital
- Forensic expertise for chat, audio and video systems > 25 years
- Forensic services for state and federal politicians
- Over 700 specialist lectures and support for security conferences in 14 countries (including AT, CH, DE, FR, NZ, SA, UK, USA)

Recording: Noerr Litigation Day, in Frankfurt am Main, for the lecture "Carelessness in times of networked cyber threats"

PAN AMP[®] and PANConference[®] are registered trademarks of PAN AMP AG © 10/2023

SERVICES

- Cyber forensics/intervention platforms
- Resilience to MITM attacks
- Clarification of damaging processes in data networks
- Forensic system audits to comply with the GDPR, the Federal Data Protection Act (BDSG) and the SEC Regulation.

PROGRESS

Since 2020, PAN AMP AG has fundamentally redeveloped the technology for secure online meetings and video conferences: PANConference® begins with identifying the system properties and then provides universal code that can be used on smartphones and desktop systems as well as on servers. Enables new levels of IT security for online meetings, video conferences, chat and stream transmissions. Participation is possible immediately and worldwide without installing any software.

Month after month, globally unique functions and features are developed for PANConference® in order to further improve the process and innovation security of customers and partners and to prevent cyber attacks, in addition to spying on user data and confidential content.

SERVICE

The PAN AMP AG helpdesk and emergency service is available to answer all questions from customers and partners about products, technologies and services. In addition, IT specialists can be made available for your IT security questions, digitalization issues and secure video conferences and can support your projects.

TESTING

PANConference® is the first solution for online meetings and video conferences to combine secure authorization of participants, a secure and GDPR-compliant connection and compliance-compliant archiving of recordings.

Interested parties can register online for a free PANConference® test access.
